

Java & JEE Training

**Day 26 – Servlet
Coding.. Coding.. Coding..**

MindsMapped Consulting

Web Server and Application Server

Internet Browser

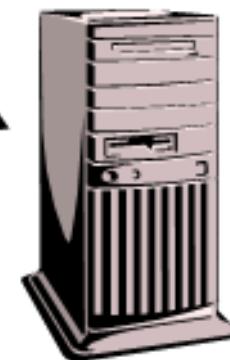

HTTP (S)

Web Server
(HTTP Server)

Presentation
Tier:
JSP, Servlets
**Run on Web
Server or
container**
**JDBC on web
server or app
server**

App Server 2

Database

Client:
HTML JS CSS
**(Run on client
machine on
the browser)**

Demo of complete Web app flow...

- Form which takes two fields... Student ID and Student Name...
- Output should show whether that row exists or not, and if it exists, how many records in the table match the criteria (id, name)
- If match found, then print login successful, else login failed.
